

DEVELOPERS OF WORKPLACE HEALTH & SAFETY SOLUTIONS SINCE 1993

## Value Proposition

### Overview

The IMS system was first released in Australia by Worksafe Management Systems in 1993 with the objective of providing a high performance, fully compliant and innovative solution for HSE management. Since then, it has been completely redeveloped to be totally web based to allow access from anywhere the Internet is available.

The key modules now include Smart phone/Tablet interface, Incident Logging, Correction & Prevention, Causal Analysis, Return to Work & Rehabilitation, Investigations, Policies & Procedures, Document Upload, Risk Management, Audit and the leading next generation web-based Business Intelligence and Reporting solution

### Client Outcomes

**Queensland Health:** Health implemented IMS State wide in 1996 after a three year pilot.

“Excerpts from Case Study:

Over the period of the Pilot, across 1700 staff, days lost to injury reduced from 2,645 to 382, an 86% reduction. Since the roll-out of the IMS Solution State wide, it has enabled:

- ✓ Better information visibility
- ✓ Improved tracking of policy effectiveness
- ✓ Standardised information collection
- ✓ Safety responsibility chains created
- ✓ Adherence to legislative requirement in incident information collection”

*Mr. Ian Bynon  
Director Safety & Wellbeing, People and Culture Strategic  
Services, Queensland Health*

### Tasports:

Excerpts from Case Study: Tangible Outcomes

“Lost-time injury frequency rates dropped from an average of **45 to 2** in three years- well below the industry average for Tasmania and amongst the best-performing ports authorities in Australia.”

“Tasports achieved certification for its Safety Management System by auditors SAI Global.”

“Tasports won the prestigious Port of the Year Award at the Lloyds List DCN Australian Shipping and Transport Awards”

“Tasports also won the “Best Injury Management” state Work Cover award.”

*Mr. John Johnston  
HSE Manager, Tasmanian Port Authority*

### Gladstone Regional Council: June 2014 – 1<sup>st</sup> Year Results

“The results for the 9 months have been nothing less than outstanding.

As at May 2014, GRC has achieved:

A gross reduction in Statutory Claims of approximately \$405,000 on the previous year’s results of \$470,000.

A net improvement versus the previous year is \$255,000 after costs of all initiatives, including the purchase of IMS.

Lost time days in 2012- 2013 were approximately 1000, and in the current year are only 160, year to date.”

*Mr. Chris Phillips  
Manager of People & Safety, GRC*

## Preconfigured prior to Implementation.

IMS is completely tailorable by you – there are 30+ Master Lists and standard reports that are delivered preconfigured as part of implementation - your Organisation Structure, your employee file and your Alert and Visibility Structure are imported initially to ensure you can start immediately

## Case Centric.

IMS is Case Centric – this means all information relating to any event is retained in a single file. This includes:

- What happened & who reported the event, reported to and date/time.
- All messages involved
- All control/corrective actions, immediate and long term, plus the people involved
- All RTW/Rehab notes and progress
- All documents, reports, investigation notes, policies/procedures active at the time, photos etc.
- Audit reports as required.

This ensures, in the event of an incident going to Court (sometimes years later) the complete time based detailed process can be provided proving all necessary steps, linked to the Standards, were taken by the Organisation.

Therefore your obligations as an employer to ‘ensure health and safety’ eliminating risks to health and safety so far as reasonably practicable, or where not reasonably practicable to eliminate the risks, reduce those risks so far as is reasonably practicable are completed efficiently.

## Integration with Key Systems

Where required, the system links with other systems such as Payroll, Insurer, Document Management and eLearning systems. This allows the ‘Best of Breed’ systems to be smoothly integrated to provide the best, most efficient management.

## Business Intelligence

WMS has the Australian and New Zealand rights to market an International Business Intelligence Solution having over 9500 implementations across America, Europe and Asia and is currently being used in more than 60% of Fortune 500 companies.

WMS BI is a simple yet powerful platform for data analysis. You can create scalable and robust solutions that lead to more informed business decisions. And you can do it without going back to your IT department.
